Policy #5121.3

GRADE POINT AVERAGE

Grade Point Average And Rank In Class

Research studies have clearly demonstrated that a student's high school academic record is the single best predictor of his academic performance at the collegiate level. Grade point average and rank in class are the summarizing figures most frequently utilized by universities and colleges to make decisions regarding student admission. The Superintendent is authorized to establish a system of determining grade point average and rank in class in the senior high schools.
